

Inclusive Childcare Training & Consultation

Childcare is in crisis.

Staff turnover – which impacts the teacher and child relationship—has never been higher.

There is a **workforce shortage**, and yet degree programs are closing.

Needs in children and their families have increased and grown more complex.

We can help.

We have over **sixty years of experience** as an exceptional early childhood education and care provider.

We use **best practices in inclusion with over 100 children every day**, with one-third of our placements dedicated to children of all abilities.

We **test emerging practices from the field** and bring the tools and strategies that we know work in child care settings.

We are experts at building capacity in teachers through **training and side by side modeling** where teachers have plenty of time to see the strategies in action.

We know how to **strengthen infrastructure and create tangible practices** to ensure every child receives the care they deserve.

Our model is unique.

We support teachers to:

Reflect on their daily classroom experiences to reduce burnout, increase self-awareness, and positively impact relationships at all program levels.

Use practical tools that support regulation in all children.

Confidently implement training day knowledge into daily practice in the classroom.

We invest in center leaders and program infrastructure to:

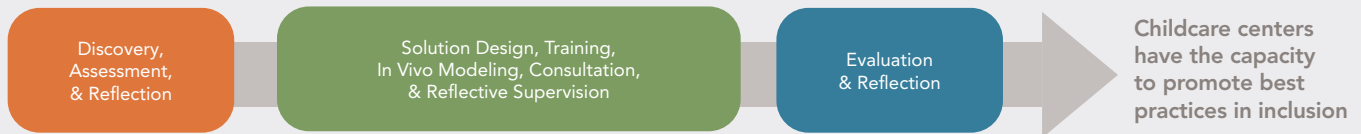

Maintain capacity and excellence even with teacher turnover.

Establish enrollment procedures that support inclusion.

Support ongoing practices that decrease **disenrollment**, **engage parents/caregivers**, and **promote referrals for assessment and early intervention**.

BUILD & SUPPORT AN INCLUSIVE MINDSET

We offer help you and your teachers can use today.

We are ready to partner with your center. Together, we'll tailor a plan that could include:

- A program health check, assessment and recommendations
- Coaching and side by side modeling to build capacity and increase confidence within the program leaders and teachers
- Training and experiential learning for all staff
- Practical and realistic tools to use in your classrooms and in other shared spaces that support curiosity, independence, and regulation
- Tangible tools to support inclusion at a programmatic level
- A longer-term plan to sustain gains.

Start today.
